ABOUT US

Horoz Traverten is a leading company in the natural stone industry. As a brand, we strive to make a difference in the construction sector with high-quality travertine products. Our commitment to our work, perfectionist approach, and innovative solutions have positioned us as pioneers in the industry.

Quality is one of the fundamental values of Horoz Traverten. Our natural stone products are obtained from meticulously selected top sources and processed using modern production techniques. We continuously improve our quality control processes to provide our customers with the highest level of durability, aesthetics, and functionality.

Our wide range of products offers solutions suitable for all kinds of construction projects. We provide travertine tiles, stair steps, wall coverings, and many other product options for both indoor and outdoor spaces. By offering various colors and patterns that align with our customers' tastes and needs, we assist them in creating their desired style in their projects.

At Horoz Traverten, we are an environmentally conscious company. We operate based on the principles of preserving natural resources and sustainability. We employ innovative solutions to minimize environmental impacts in our production processes and keep waste at a minimum. Our aim is to be an exemplary role model in sustainable natural stone production.

Customer satisfaction is a priority at Horoz Traverten. Our expert team members closely follow your projects and provide customized solutions to meet your needs. By combining our quality service approach with timely delivery and customer-oriented approach, we aim to add value to our customers.

At Horoz Traverten, we take pride in offering the aesthetic gems of natural stone to our customers. We are happy to support you in bringing your creative projects to life and adding natural beauty to your spaces.

LUCIDA & OCEAN APPLICATION

Horoz Travertine's total area is 35.000 m2 and its closed area is 7000 m2. Except for the mass production of crosscut-honed/filled, the production of all other thing is done professionally. With its professional team in the field, its primary aim is always customer satisfaction.

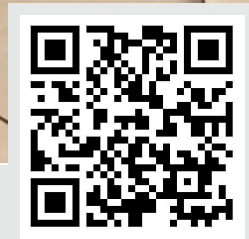

Horoz Travertine, which has made a name for itself in the marble industry by giving importance to R&D studies, has started Hexagon production with a specially developed machine of its own design since 2021. This model, where naturalness and aesthetics meet, has attracted attention especially by architects and has been used in many projects.

As Horoz Travertine, an environmentally sensitive policy has been followed and in this direction; in 2023, GES became to active in our factory. At the same time, groundwater can be purified in our factory and used as drinking water both in production and in the administrative building by adding the necessary minerals. Our aim is to carry out sustainable activities and to avoid harming the environment to the maximum extent during this activity. As a company engaged in the production and export of natural stone, it is one of our primary duties to impose the importance of the limited and efficient use of our natural resources on our working life by applying it almost everywhere.

Horoz Travertine pays attention to the employment rate of women by giving importance to women to play a role in working life as much as men. Occupational health and safety is given great attention in the production area and the opportunity to work in a clean area is provided by considering the health status of the workers.
